
ORTHODOXY BY GK CHESTERTON

The title alone will scare off many libertarians and they would be wrong. This book is about mans quest for real freedom not the abstract freedom most of us want and obtain. Chesterton explains how one may obtain freedom, that is , only through, truth. Their can be no freedom without truth. Some say there are no truths or that truth is different for everyone, that in itself is a lie. they do not want you to experence real and true freedom. To enjoy this book you must be open minded and be ready to toss aside some of your old beliefs, if you read this book you will experence what real freedom is. Enjoy!!!!!!

There must be one brave libertarian who is willing to read this book. I challenge you good people to read and enjoy a very important work. Just because chesterton is not considered an orthodox libertarian that does not mean he cannot write about freedom, you will be very surprised at what he has written.

295 libertarians have passed on my challenge to read chesterton. He wrote a novel called Man Alive. This is about a man who keeps breaking the law but is always innocent. That happens to be his name, Innocent Smith. He is always tring to find new ways to discover himself. there lies his quest for freedom. This is an interesting and human novel . This is about the true freedom of spirit.
